

International Symposium on Interaction of Non-Nuclear Munitions with Structures

1991

General Topics		
John R. Hayes, Jr., US Army CERL, USA 11. J. Hall, us Army CERL, USA Dr. S.L. Paul, US CERL, USA	Comparison of Finite Element Model with Measured Field Test Data	3
Dr. Douglas H. Merkle, Applied Research Ass. USA J. Jeffrey Howard, Applied Research Ass., USA Capt. Richard A. Reid, US AFESC, USA Lt James M Underwood, US AFESC, USA Thomas Warren, Applied Research Ass., USA	Postattack Airbase Facility Recovery	4
Dr. S.L. Paul, US Army CERL, USA J D. Haltiwanger, US Army CEPL, USA D. Grossman, US Army CERL, USA J.B. Gambill, US Army CERL, USA John R. Hayes, Jr., US Army CERL, USA	Comparison of Microcomputer Structural Response Models with Measured Field Test Data	11
Capt. Richard A. Reid, US AFESC, USA	Full-Scale Blast Test of a Reinforced Soil Bunker	12

Structural Design		
Capt. USAF Timothy L. Boone, Phillips Laboratory (AFSC), USA Dr. Harold C. Sorenson, Washington State University, USA	Evaluation of the Survivable Collective Protection System(SCPS)	19
Eduard H. Bultmann, Jr., Ph.D., USA	Full Scale Teat of a Blast Resistant Structure	27
Reuben Eytan, Eytan Building Design Ltd., Israel	Optimal Design of Protective Structures Using Computer-Aided Risk Analysis	34
Maj USAF Clarence J. Fennell, Phillips Laboratory (AFSC), USA Capt USAF Timothy L. Boone, Phillips Laboratory (AFSC), USA Brent Satterwaite, Phillips Laboratory (AFSC), USA	An Experimental Evaluation of the Protection from Conventional Weapons Effects Provided by the Base Damage Control Center	43
Eugene R. Fosness, Phillips Laboratory (AFSC), USA Rodney	Effects of Enhanced Blast Munitions on Aircraft Shelters	51
Prof. Theodor Krauthammer, Pennsylvania State University, USA H.H. Shanaa, Pennsylvania State University, USA	Modified Analysis of Reinforced Concrete Structures under Impulsive Loads	59
Helge Langberg, Defence Research Establishment, Norway	The Effect of Berming on the Response of Structures Subjected to Nearby Explosions	67

Structural Design		
Capt USAF David H. Pyle, US Air Force Europe, Germany Prof. Thomas T. Barber, University of Virginia, USA	Analysis of Semi-Hardened Structures Subjected to Conventional Weapons Environments	75
Tan See Ting, Public Works Department, Singapore	Development of a Working Tool for the Protection, Risk and Cost Benefit Evaluation of Provisional Shelters (PRICE)	83
R.J.M. van Amelsfort, Prins Maurits Laboratory TNO, Netherland Ir. Jaap Weerheijm, Prins Maurits Laboratory TNO, Netherland	The Failure Mode of Concrete Structures Due to Contact Charges	91
Prof Chen Zhaoyuan, Tsinghua University, Republic of China Miao Qisong, Tsinghua University, Republic of China Wang Zhihao, Tsinghua University, Republic of China	Collapse of Shear Wall Buildings Under Blast Loading	101
Dr. George M. Zintilis, Advanced Mechanics & Engineering, United Kingdom S. Syngellakis, Advanced Mechanics & Engineering, United Kingdom Alastair C. Walker, Advanced Mechanics & Engineering, United Kingdom	Analysis of Buried R.C. and Metal Structures Subjected to Blast Loading ;	109

Boden-Bauwerk-Interaktion Soil-Structure-Interaction		
Major Kevin J. Claber, RARDF., United Kingdom Dr. Michael C.R. Davies, University of Wales, United Kingdom Mark C. Saunders, RARDE, United Kingdom	Validation of a Finite Difference Code Using Model Tests of Dynamic Soil Structure Interaction	119
Dr.Eng. Kazuo Fujimoto, 4th Research Center, Japan Ms.Eng Hiroshi Yamaguchi, 4th Research Center, Japan Mitunori Sayama, 4th Research Center, Japan Yasuhisa Kuzuha, 4th Research Center, Japan	Effects of Cushion Layer for Underground Structure Subjected to Impact Loadings	126
Prof. Dr. -Ing. Hans; Ludwig Jessberger Ruhr Universität Bochum, Germany Dr. -Ing. Gerhard Thiel, Ruhr Universität Bochum, Germany	Untersuchung zum Einfluß der Baugrunddämpfung bei explosionsartiger Belastung auf die Verformungs- und Lastzustände von unterirdischen Bauwerken mit Hilfe einer geotechnischen Großzentrifuge	132
Rahamim Melamed, Star Engineers Ltd., Israel S. Schwarz, Technion I.I.T - Haifa, Israel	Foundation Systems of Civil Defense Shelters and Protective Structures	137
Harry J. van der Graaf, Delft Geotechnics, Netherland	Tests on the Interaction of Contained Explosives with a Small Buried Shelter in Saturated Sand	145
Otto von Estorff, IABG, Germany Dr. W. Pfrang, IABG, Germany Dipl. -Ing. Wilfried Bergerhoff, IABG, Germany BOR Ferdinand Glaser, WTD 91, Germany	Numerische/Experimentelle Untersuchung des dynamischen Verhaltens eines Flugzeugshelters der 3. Generation infolge einer Detonation im Boden	153

Boden-Bauwerk-Interaktion Soil-Structure-Interaction		
Maj John J. Gill , Ph.D. , Phillips Laboratory (AFSC), USA	Modeling of Explosively-Formed Craters/ Analysis and Comparison of Prototype and Reduced-Scale Test Events	161
Dr . Robert W. Henny, Phillips Laboratory (AFSC), USA	A Study of Cratering Phenomena from Conventional Weapons Using Small Charges in a Half Space Apparatus	162
A.H. Dancygier, Northwestern University, USA Prof. Surendra P. Shah, and Prof Leon M. Keer Northwestern University, USA	Dynamic Response of Embedded Circular Reinforced Micro-Concrete Slabs – An Experimental Study	163
Harold D. Zimmerman, California Research and Technology, USA Marvin Y. Ito, California Research and Technology, USA .Jon E. Windham, US Army Corps of Engineers WES, USA.	Hydrocode Analysis of Ground Shock Environment from Buried Subscale Munition Tests in Wet Clay Backfill	171

Computer-Programme Computer Simulation		
Stephen. A. Akers, us Army Corps of Engineers WES, USA Jill Stelter, California Research & Technology, USA	Saber-PC: A Ground Shock Software Package for the PC	175 NATO
Dr. B. Fießler, IABG, Germany BOR Ferdinand Glaser, WTD 91 Germany	Numerische Simulation eines Luftstoßes gegen das Ausblasbauwerk eines Shelters	176
OTL Ronald Kaufmann, AStudÜbBw, Germany	Kurzdarstellung ausgewählter APC- Rechenprogramme zur Ermittlung von Waffenwirkungsparametern und zum Standsicherheitsnachweis von Baustrukturen gegen Wirkungskomponenten	186
Capt. Diane Miller, US AFESC, USA William L. Hacker, Applied Research Ass. USA	Survivability Assessment Methodology	194
Dr. Micheal J. Murphy, Hydrossoft International , USA	DYNA/NIKE Modeling of shock Wave Interaction and high Explosive Effects on a Personal Computer	195
Michael M. Swisdak, Jr. US Naval Surface Warfare Center, USA Paul E. Montanaro, US Naval Surfaces Warfare Center, USA	INBLAST – A New Revised Computer Code for the Prediction of Blast Inside Closed or vented Structures	196
Dr. Alan J. Watson, Brian Hobs, Dr. Andrew K. Chan, Jeffrey Peters, R. Westaway University of Sheffield, United Kingdom	A PC Based Program for Blast Load Analysis and Damage Estimation	197
Prof. Dr. David Yankelevsky, Israel Institute of Technology, Israel	Penetration of a Rigid Projectile into a Semi-Infinite Layered Medium	205

Druck in Tunneln/Detonation im Innern Pressure in Tunnels/Internal Detonation		
Eduard Binggeli, AC-Laboratorium Spiez, Switzerland Dipl.-Ing. Bernard Anet, AC Laboratorium Spiez, Switzerland	Experimentelle Untersuchung der Ausbreitung konventioneller Luftstöße in Tunnelsystemen	209
Prof. Richard H. Fashbaugh, P.h.D. University of Nevada, USA	Computer Code SPIDS / Shock Propagation in Ducting Systems Utilizing a PC Computer	218
Ir. W.P.H. Mercx, Prins Haurits Laboratory TNO, Netherland Ir. Jaap Weerheijm, Prins Maurits Laboratory TNO, Netherland	Experiments to Validate the Structural Behaviour of a New Laboratory for Ballistic Research	226
Dipl.-Phys.Dr. Günter Scheklinski-Glück, Ernst Mach Institut, Germany	Parameterstudien zum Luftstoß in Expansionskammern und Zuführungskanälen	227

Druckstoßventile Blast Valves		
Quentin A. Baker, Wilfred Baker Engineering Inc., USA Dr. Wilfred E. Baker, Wilfred Baker Engineering Inc., USA Dr. Christopher Y. Tuan, Wilfred Baker Engineering Inc., USA	Analytical Study of Passive Airblast Attenuation Valves	237
Ann-Sofie Forsberg, Royal Swedish FortF, Sweden	Blast Valves - Unnecessary Expense or Vital Components in Structure Hardening	238
Jürg Hasler, LUWA Ltd, Switzerland	Passive Blast Attenuators - A Possible Alternative to Active Blast Valves?	246
Randy L. Holmes, US Army Corps of Engineers WES, Paul W. Graham, US Army Corps of Engineers WES, USA Gayle E. Albritton, US Army Corps of Engineers WES, USA	An Experimental Study of Airblast Attenuation Devices	253 NATO

Eigenschaften von Material Material Properties		
Mark Anderson, Ph.D. Applied Research Ass., USA	The Use of Shotcrete for Expedient Repair of Bomb-damaged Structures	259
Prof. Theodor Krauhammer, Dr. Chandra, Pennsylvania State University, USA	Fracture Mechanics Model for Concrete under High Loading Rates	267
Capt. USAF Steven T. Kuennen, US AFESC, USA Prof. C. Allen Ross, US AFESC, USA Prof. J.W. Tedesco, Auburn University, USA	Strain-Rate Effects on compressive Testing of Foam	275
Dipl.-Ing Christoph Mayhofer, Ernst-Mach-Institut, Germany	Experimentelle Untersuchungen zum dynamischen Tragverhalten von Sonderfaserbeton -- Sifcon	281
Dr. L.C. Muszynski, M.A. Rochefort, Applied Research Ass, USA	Fibrous Shotcrete for Expedient Repair of Structures	291

Eigenschaften von Material Material Properties		
Dr. A. James Sheridan, Royal Aerospace Establishment, UK A.D. Pullen, Imperial College, United Kingdom Prof. -Dr. Simon H. Perry, Trinity College, Ireland	Material Modelling for Hydrocode Analysis of Concrete Response to Explosive Loading	301
Prof. Parviz Soroushian, Ph.D., Michigan State University, USA Atef Tlili, Michigan State University, USA	Impact resistance and Toughness of Polymer-Modified Steel Fiber Reinforced concrete	309
Ms.Eng Hirochi Yamaguchi, 4th Research Center , Japan Dr. Eng. Kazuo Fujimoto, 4th Research Center , Japan	Strain Rate Effects on Dynamic Response of Reinforced Concrete Plate under Impact Loading	317

Eigenschaften von Waffen Weapons-Characteristica		
Dr.-Ing. Werner Heilig, Ernst-Mach Institut, Germany	Measured Parameters of the Airblast Loading of Generic Models from Shock Tube Tests and Comparison with SHARC-Code Calculations	327
Stan Lokaj, Phillips Laboratory (AFSC), USA	Enhanced Blast Munitions Effects Program	329
Mark E. Majerus, California Research and Technology, USA Dr. Ronald E. Brown, California Research and Technology, USA	The Design and Evaluation of Shaped Charges Using Codes Developed for Micro-Computers	330

Munitionssicherheit Munition Safety		
Prof ir. Roger Bourgois, Royal Military Academy, Belgium Guido C. Maeyaert, Ministry of Defence, Belgium Bruno Peymen, Royal Military Academy, Belgium P. Joos, Royal Military Academy, Belgium	Scale Model Analysis of an Ammunition Plant	339
Dr. Manfred Held, Messerschmitt-Bölkow-Blohm, Germany	Splittermassenverteilung der Trümmer von gesprengten Flugzeugsheltern	346
A.G. Papp, S.L. Young, D.D. Barker, Mason & Hanger-Silas Mason Co., USA	Fragment and Debris Hazard Evaluation Project	355
Capt USAF Glen J, Pappas, Phillips Laboratory (AFSC), USA	Identification of Wall Concepts to Prevent Sympathetic Detonation in Munition Storage Magazines	363

Penetration		
Dipl.-Phys Hans-Dieter Ackermann, MBB Deutsche Aerospace, Germany Dipl.-Ing. Stefan Langer MBB Deutsche Aerospace, Germany	Eindringleistung und Sprengwirkung eines Penetrators gegen Runway-Ziele	373
Dr. William F. Anderson, University of Sheffield, United Kingdom Dr. Alan J. Watson, University of Sheffield, United Kingdom Dr. Jeffrey Peters, University of Sheffield, United Kingdom	High Velocity Projectile Penetration into Cementitious Materials	381
James D. Cargile, US Army Corps of Engineers WES, USA Toney R. Cummins, US Army Corps of Engineers WES, USA	Effectiveness of Steel Bars for Inducing Yaw in the Flight Path of a Subscale armor piercing Projectile	388 NATO
John a. Collins US AFATL, USA Martin J. Schmidt, US AFATL, USA Dr. Frank A. Maestas, Applied Research ASS, USA John C. Galloway, Applied Research ASS, USA Larry L. Brown, Denver research Institute, USA James A Keller, Denver research Institute, USA	Scaled Underground Computer Center/ Test and Analysis	389
John a. Collins US AFATL, USA Dr. Frank A. Maestas, Applied Research ASS, USA John C. Galloway, Applied Research ASS, USA Barry L. Bingham, Applied Research ASS, USA	The Effect of Rebar on Projectile Penetration	397
Dr. Sc. Nat. Daniel Favarger, Gruppe für Rüstungsdienste, Switzerland	Impact of bombs on Hard Layers	404
Dr. Michael J. Iremonger, Royal Military College, United Kingdom	Computer Modelling of Small Arms Penetration of Concrete	405
Dr. Frank A. Maestas, Applied Research ASS, USA John C. Galloway, Applied Research ASS, USA James C. Partch, Applied Research ASS, USA Lt. Col. Carlos Rubio, Defense Nuclear Agency, USA Capt. Rayment E. Morjoy, US Army Corps of Engineers WES, USA	Penetration Mitigation for Theater Air Bases	413
Dipl. – Phys. Ernst Rottenkolber, Messerschmitt-Bölkow-Blohm, Germany	Ein semiempirisches Programm zur Strukturauslegung von Penetratoren	420
L.E.Tidwell US Army Corps of Engineers WE, USA	Projectile Penetration into Conventional and High Strength Concrete	426 NATO
Prof. Dr. David Yankelevsky, Israel Institute of Technology, Israel	Local Response of concrete Slabs to Low Velocity Impact	127

Probabilistische Verfahren/Bedrohung Probabilistics/Threat		
Dr. -Ing. Erwin Kessler, Switzerland Dipl.-Ing. Bernard Anet, AC Laboratorium Spiez, Switzerland	Ein probabilistisches Schutzraum-Risiko-Modell	431
R. H. Sues, Applied Research Ass., USA C.-W. Huang, Applied Research Ass., USA Dr. Laurence A. Twisdale, Applied Research Ass. USA	Reliability-Based Design of R/C Structures for Protection Against Projectiles and Fragments	438
Dr. Laurence A. Twisdale, Applied Research Ass. USA R. H. Sues, Applied Research Ass., USA Capt. Diane Miller, US AFESC, USA	Research to Develop Reliability-Based Design Methodology for Protective Structures	441

Schock im Bauwerk Instructure Shock		
James W. Ball, US Army Corps of Engineers WFS USA Stanley C. Woodson, US Army Corps of Engineers WES, USA Prof.Dr. Sam a. Kiger, University of West Virginia, USA	Conventional Weapon-Induced Shock Environment in a Prototype Structure	445 NATO
Peter Hunziker, AC-Laboratorium Spiez, Switzerland Dr.-Ing. Erwin Kessler, Switzerland	Die Schockbelastung von Schutzbauten infolge konventioneller Waffenwirkung	446
OTL Hans-Georg Mett, AStudÜbBw, Germany	Untersuchung der schocksicheren Lagerung, Aufstellung und Befestigung von Ausstattungsteilen in Schutzbauten bei hoher, kurzzeitiger Belastung	454
Dr. Fritz Rischbieter, BATTELLE, Germany P. Corvin, BATTELLE, Germany	Entwicklung von Schockprüfständen zur Simulation konventioneller Waffenwirkungen im Hochschockbereich	463
Jyrki Ronkainen, TEMET Oy, Finland	Isolation of Large Displacement Stochastic Shock Loadings	472
Joseph L. Smith, JAYCOR, USA Dr. Paul F. Mlakar, JAYCOR, USA	A Simplified Two-Dimensional Methodology for Predicting In-Structure Shock for Complex Structures	478

Tragverhalten von Bauteilen Bearing Capacity of Construct. Members		
Prof.Dr.-Ing Josef Eibl, Universität Karlsruhe, Germany	Stahlbetonplatten unter Stoß- und Explosionseinwirkung	489
Dipl.-Phys. Gerhardt H. Gürke, Ernst Mach Institut, Germany	Die Wirkung von Versteifungen bei der Verformung von Stahlplatten unter impulsartiger Blastbelastung	497
