

International Symposium on Interaction of Non-Nuclear Munitions with Structures

1987

BODEN-BAUWERK-INTERAKTION Soil-Structure-Interaction		
J.L. DRAKE, R.A. FRANK, M.A. ROCHEFORT: Applied Research Ass.-Inc., USA	A Simplified Method for the Prediction of the Ground Shock Loads on Buried Structures	3
S.R. WHITEHOUSE, S. KOPINSKI, C. NOACK; US Air Force Academy, USA	An Evaluation of Simple Soil-Response Models Against Ground Shock Data from the Multi-Unit Structure last (MUST) Series	15
F. GLASER: Erprobungsstelle 91 Bw, F.R. GERMANY	Erprobung verschiedener Zwischenschicht- Materialien für Stahlbetonschutzbauten in Schildplattenbauweise	26
J.W. TEDESCO, D.W. LANDIS; Auburn University, USA J.R. HAYES ; AFESC, USA	Dynamic Analysis of Layered Structures	34
E.E. HINMAN, P. WEIDLINGER: Weidlinger Associates Consulting Engineers, USA	Single Degrees of Freedom Solution of Structure-Medium Interaction	44
K. FUJIMOTO; 4th Research Center, JAPAN N. ISHIKAWA, M, MORI; National Defense Academy, JAPAN	Dynamic Response of Buried Cylinder in Cohesive Soil Subjected to Shock Wave	60
H.J. LUDEWIG: Amt Itr Studien und Übungen Bw, F.R. GERMANY J.D, PRENDERGAST; US Army CERL, USA	Optimization of Walls and Roofs of Buried Structures	75
J.L. DRAKE, C.J, HIGGINS: Applied Research Ass.-Inc., USA	Scaling Explosion-Produced Ground Motions from Various Buried Source Geometries	83

ERDSTOSS/ KRATER Ground Shock/ Cratering		
W. BERGERHOFF, W. PFRANG, H.J. SCHITTKE; IABG, F.R. GERMANY F, GLASER: Erprobungsstelle 91 BN, F.R. GERMANY	Die numerische Simulation einer verdämmten Bodendetonation	93
R.W. HENNY: USAFWL, USA P.H. ROUPAS, K,A, BENSON; NM ER I, USA	A Comparison of Cratering Phenomena for a High-Slenderness Ratio Bomb and an Equivalent High Explosive Sphere	108

PENETRATION/ PERFORATION		
E. HOLLMANN, Deutsch-Französisches Forschungsinstitut ISL, FRANCE	Endballistische Grundlagen duktiler Stabgeschosse	135
D. SCHWARZKDPP; Ruhr Universität Bochum; , F.R. GERMANY R. ZINN, Zerna; Schnellenbach und Partner, F.R. GERMANY	Vereinfachtes nichtlineares Rechenverfahren zur Auslegung von Stahlbetonplatten für Projektilanprall unter Berücksichtigung von Penetration und Projektildformation	149
D. FAVARGER: Gruppe für Rüstungsdienste, SWITZERLAND	Erweiterung der Eindringtheorie von Barnard für duktile Geschosse	168
L.E. SCHWER: APTEK Inc., USA J. DAY; Lockheed Missile, & Space Comp., USA II. ROSINSKY; Lawrence Livermore National Lab., USA	A Lagrangian Technique for Predicting Earth Penetration Including Penetrator Response	174
A, STJLP, H, LANGHEIM; Ernst-Mach-Institut, F.R. GERMANY H. SCHILLING; Fa. Rheinmetall, F,R, GERMANY	Eindringverhalten von KE-Penetratoren in Betonziele	203
D. RUSSWURM: Ami für Studien und Übungen Bw, F.R. GERMANY	Bomben gegen Stahl	204
D.BUSER; Stab der Gruppe für Generalstabsdienste, SWITZERLAND	Wirkung verschiedener Schutzschichten auf das Eindringverhalten von großkalibrigen Bomben	208
P.T. NASH; S w RI, USA	Buckling of Bombs Impacting Concrete Targets	210
R. FORSEN; National Defense Res.Inst., SWEDEN	Bomb Penetration into Concrete Buildings Simulated by one fourth Seals Model Experiments	223
E.H. BULTMANN Jr.; N M ERI, E. FOSNESS; USAFWL, USA	Projectile Penetration into Concrete and Steel	235

BEMESSUNG / Design		
W, HEIERLI, M, GLOOR; Ingenieurbüro Heierli AG, SWITZERLAND	Grundsätze des Entwurfs von Schutzbauten gegen konventionelle Waffen	247
M. AMEND; USAFATL / SAV, USA	Equivalent Unit Moment Capacity of Reinforced Concrete Sections Using Yield Line Theory	279
M,J, FLATHAU, P,F, MLAKAR, L.M. BRYANT; JAYCOR, USA	Single-Degree-of-Freedom Analysis of Buried Arches Loaded by Conventional Ground Shock	285

HOHLADUNGEN / Shaped Charges kleine Kaliber / small Calibers		
M, HELD; Fa. MBB, F.R. GERMANY	Das Durchschlagvermögen von Hohlladungen in Erde und Beton - Experiment/ Theorie	311
H.J. IREMONGER; Royal Military College of Science, UK	Small Arms Protection Using Concrete/Steel Sandwich Construction	337

SPLITTER/ Fragment DRUCK / Blast		
M,C, DASS, L.A. TWISDALE! Applied Research Ass.,-Inc., USA	Comparison of Design Procedures far Fragmentation Effects	347
R, KOOS; Amt für Studien und Übungen Bw., F.R, GERMANY	Die kombinierte Luftstoß-Splitter-Last, eine quantitativ bestimmbare Größe für die Schutzbaubemessung?	348
F.BULMASH, G,A, COULTER, C.N. KINGERY; US Army BRL, USA	A Direct Measurement Technique to Obtain Acceptor Wall Fragment Velocities in the Severe Environment near an Exploding Above-ground Magazin Model	367
R. HARTWIG; Erprobungsstelle 91 Bw, F.R. GERMANY	Eine neue Messeinrichtung zur Ermittlung von Splitterflugzeiten und Splittergeschwindigkeiten für Erst- und Folgesplitter	377
S,D, WERT, J.E.PRENDERGAST; USAFWL, USA	Improved Large Scale Airblast and Fragmentation Characterization Testing of Conventional Munitions	388
K. A. MARCHAND : S w R I, USA C.A. ROSS; AFESC, USA J.D.PRENDERGAST; US Army CERL, USA	The Resistance of Sand Barrier Walls to Simultaneous Fragment and Blast Loadings	415
J.D. TANCRETO, G.E. MEYERS; Naval Civil Engineering Lab., USA	Initial Criteria for Blast Resistance Poly- carbonate Glazing	429

Shock		
F, RISCHBIETER; Battelle, F,R. GERMANY	Ermittlung von Schock-Responsespektren bei Kontaktdetonation an Schutzbauten	433
S.R. WHITEHOUSE, A.C. NUNEZ, R.E. DONNELLY; US Air Force Academy, USA C.MEDINA; USAFWL, USA	An Evaluation of Simple Equipment-Response Models Against Data from the Multi-Unit Structure Test (MUST) Series	445
L KESSLER; Beratender Ingenieur B. ANET; AC Laboratorium Spiez, SWITZERLAND	Stochastic Methods for Shock-Safe Fixtures in Shelters	459

MATERIAL		
D, KRAJCI:NOVIC, A, STOJHIROVIC, D, SUMARACi University of Illionoi,, USA	A Simple Continuum Theory of Spall Damage	475
W. AHMANN; Eidgen8ssische Technische Hochschule, SWITZERLAND	Material Properties of Reinforcing Steel Concrete at Elevated Strain Rates	492
A.J. SHERIDAN; Royal Aircraft Establishment, UK	Response of Concrete to High Explosive Detonation	494
C.W, FELICE; USAFNL, USA E.S. GAFFNEY; Ktech Corp., USA	Early-Time Response of Soil in a Split- Hopkinson Pressure Bar Experiment	508
C.A, ROSS, P.Y, THOMPSON; AFESC, USA P.T. NASH; S w R I, USA	Dynamic Testing of Soils using a Split- Hopkinson Pressure Bar	525
P. SOROUSHIAN, J, SIM; Michigan State University, USA	Strain Rate Effects on the Dynamic Response of Reinforced Concrete Elements to Impulsive Loads	538
S. CHENEY; USAFWL, USA J.M. CARSON; N M E R I, USA H. SWIFT; Physic, Application, Inc., USA	SIFCDN Impact Performance	557

TRAGVERHALTEN Mechanics of Structural Elements		
G.A. HEGEHIER, H.E. READ, H, MURAKAMI, K.C. VALANIS; S-CUBED, USA	On the Synthesis of Response and Damage in Reinforced Concrete	585
C. MAYRHOFER; Ernst-Mach-Institut, F.R. GERMANY	Experimentelle Untersuchungen zum Tragverhalten von Verbundkonstruktionen bei Druckstoßbelastungen	589
F. STANGENBERG; Ruhr Universität Bochum, F.R, GERMANY	Beton und Stahlfaserbeton im Vergleich für Stoßbelastungen	604
W. JONAS, H. RIECH; Hochtief AG, F.R. GERMANY	Bauteile aus Stahlfaserbeton unter stoß- artiger Belastung	623

HARTUNG/ Hardening BEMESSUNG /Design		
R, EYTAN; Eytan Building Design Ltd., ISRAEL	The Use of Practical Experience in the Optimal Design of Structures Hardened Against Conventional Weapons	647
R, EYTAN; Eytan Building Design Ltd., ISRAEL	The Use of Practical Experience in the Optimal Design of Structures Hardened Against Conventional Weapons	657

Örtliche Wirkung / Local Effects		
K. WILLAM, K. MONTGOMERY; University of Colorado, USA	Fracture Energy-Based Softening Plasticity Modal for Shear Failure	679
W.P.H. MERCX, A. HARMANNY; Prins Maurits Laboratorium TNO, NETHERLANDS	The Normal Mode Technique: A Useful Tool to Investigate the Behaviour of Structures Subjected to Local Impulsive Loading	682
T. KRAUTHAMMER, S. SHAHRIAR, H.M. SHANAA; University of Minnesota, USA	The Effects of Severe Localized Dynamic Loads on RC Beams, Columns, and Slabs	707

REAKTION / Response WIRKUNG / Effects		
D.Z. VANKELEVSKY; Technion, ISRAEL	Instability Phenomenon in Plates Subjected to Impulsive Loading	731
B. VRETBLAD, P. BALAZS; FORTF, SWEDEN	Composite Structures Exposed to Blast Loads	736
J.M. CARSON, D. MORRISON; NM ER I, USA	Conventional High Explosive Blast and Shock (CHEBS) Test Series: Mark 83 General Purpose Bomb	839

PROBABILISTISCHE METHODEN Probabilistic Methods		
K.C. CHOU, H.-C. CHANG; Syracuse University, USA	Protective Structures from Nonnuclear Weapons- A Probabilistic Approach	741
LA. TWISDALE, J.L. DRAKE; Applied Research Ass.-Inc, ,USA	Toward Reliability-Based Design of Protective Structures	749

MODELL/ VERSUCHE Modeling/ Testing		
S.H. PERRY; Trinity College, IRELAND A.D. PULLEN; Imperial College of Science and Technology, UK	A Laboratory Method für the Investigation of Near- Field Soil Response to Conventional Explosive Blast 753	753
P. BALAZS, B. VRETBLAD; FORTF , SWEDEN D.R. COLTHARP, R.S. WRIGHT USAEWES, USA	Blast Response Tests of a Swedish-Norwegian Structure	764
H.M. SWISDAK Jr.; NSWC , USA J.M. WARD ; DoDESB, USA	Aircraft Shelter Model Test Program	778

MODELL / Modeling DRUCKABSCHLÜSSE /Blast Valves		
J.W. HOUSE, K,H, WOHPLETZ, J,A, BROWN Los Alamos National Laboratory, USA E,S. GAFFNEY; Ktech Corp., USA	Modeling of Buried Explosions	797
F,C, TOWNSEND, J,J, GILL, D. BLOOMQUIST, S. ZALSMAN-C, H. TABATABAI, H.C. McVAY; University of Florida, USA	Centrifugal and Numerical Modeling of Buried Structures Subjected to Blast Loadings	811
T.P. CARROLL; T.Carroll Ass.,Inc.,USA	Criteria for the Selection of Blast Valves for Protective Structures	839

NATO nur Kurzfassungen / Abstracts only		
H.J. McVAY, D.R. COLTHARP; USAEWES, USA	Spalling of Concrete from Nearby Detonations	861
C.E. JOACHIM; USAEWES, USA	Predicting Linear Shaped Charge Penetration in Concrete	862
B. ROHANI; USAEWES, USA	Penetration of Kinetic Energy Projectiles into Rock-Rubble/Boulder Overlays	863
S,A. KIGER, D.W. HYDE; USAEWES, USA L.K. GUICE; Louisiana Tech, University, USA	Flexural Response of Reinforced Concrete Structures to Conventional Weapons	864
J,R. BRITT, J,L, DRAKE; Applied Research Ass,-Inc.,USA	Blast Loads from Internal Explosions and other Reflected Shock Waves	865
D.R. COLTHARP, M.K. McVAY, J.W. BALL, USAEWES, USA	Mitigation of Blast and Fragment Loads by Use of Sacrificial Walls Effectiveness of Sacrificial Concrete Panels in Reducing Blast and Fragment Loads	866
P.G. HAYES; USAEWES, USA	Protection from Conventional Weapons Using Sandgrid Revetment Systems	867
