

International Symposium on Interaction of the Effects of Munitions with Structures 1999

Ågårdh, Lennart; Hansson	Experimental and Numerical Studies of Fragment Penetration and Perforation of HPC	
Balazs Peter; Mikael Hallgren	High Performance Concrete Beams Subjected to Impulse Load	
Baum Joseph D.	A New Coupled Cfd/Csd Methodology for Modeling Weapon/Target Interaction	
Ben-Dor, G.; Britan, A.	Shock Wave Interaction with Granular Materials	
<u>Binggeli, Ed.</u> ; Anet, B.	The Use of the Ls 2000-Design Charts for Predictions of Air Blast Loading in Tunnels Due to He-Detonations at the Tunnel Entrance	
<u>Buzaud, E.</u>	Perforation Studies into Mb50 Concrete Slabs	
<u>Buzaud, E.</u>	Hard Target Defeat: An Analysis of Reinforced Concrete Perforation Process	
Carl, Dietmar	Measured and Computed Pressures in Concrete Targets Subjected to Close in Detonations	
<u>Corley, J.</u> ; Mayrhofer, Thoma K.	Explosives with Expanded Load Duration and the Influence on the Structure Behaviour during Confined Detonations	
Cowler, M.S.; Luttwak, Gabi	Advanced Eulerian Techniques for the Numerical Simulation of Impact and Penetration using AUTODYN-3D	
<u>Darrigade, A.</u> ; Buzaud, E.	High Performance Concrete : A Numerical and Experimental Study	
Dirlewanger, Hans	Comparison of Different Pressure Transducers and related Numerical Simulations	
Ernst, H.-J.; Hoog, K.	Quasi-Ductile Penetration Behaviour of Brittle Materials	
Eytan, Reuben	Development and Implementation of Innovative Cost-Effective Retrofit Protective Measures in Existing Buildings	
<u>Fairlie Greg E.</u> ; Livingstone	Analysis of Fragment Throw Distances from High Explosive Detonations in Masonry Structures	
Fang, Qin	Analysis of Local Effects on Concrete-Steel Plate Composite Structures under Impulsive Loads	
Fang, Qin	A Numerical Analytical Procedure for the Flexural Failure of R/C Beams under Blast Loads	
Gott, Michael B.; Watson, Alan J.	The Applicability of the SDoF Method for Modelling Global Structural Response to the Pressures Produced by Charges at Short Stand-Off Distances	
Gran, Moxley, Adley	Measurement of Triaxial Stresses during Deep Penetration into Concrete	
Hasselmann, Anderson, Crawford	Validation and Verification of Nonlinear Dynamic Models	
Held, M.	Diagnostic of Momentum Distribution and Damage Contour of Non Spherical High Explosive Charges	
Hinman, Eve; Foadian, H.	Response to Glass Curtain Walls To Explosive Effects	
<u>Hulton, F.G.</u> ; Enstock, L.K.	The Direct Measurement of Close-in Loading	
<u>Hulton, F.G.</u> ; Gough, M.S.	The Development of Steel-plate/Reinforced Concrete Composite Panels to Resist Explosive Attack	

Iremonger, Dr Michael John	Single and Multi-Hit Penetration of Unconfined and Confined Concrete by Small Arms Bullets	
Ishikawa, Nobutaka	Failure Behavior of Prestressed Reinforced Concrete Beams under High Speed Loading	
Johnson, Nicholas F.	European Blast Resistant Glazing Standards -The Shock Tube And Range Tests Compared	
<u>Kennedy</u> , Iremonger, Kadi, A.	The Response of Glass Cladding on Large Buildings to Blast Attack and the Use of Multi-Panel Designs	
Klughardt, G.	Testing of Concrete-Penetrating Bombs from the Inventory of the Former GDR's Armed Forces	
Krauthammer, O'Daniel	Undex Response Validation by Numerical Simulations and Precision Impact Testing	
Krauthammer, Zineddin,	Structural Concrete Slabs under Localized Impact	
Lee, C.K.B.; Peyton, Tennant	Modeling Fragment Impact Loads on Reinforced Concrete Walls in Finite Element Structural Dynamics Codes	
<u>Levine, H</u> , Tennant, D.; Mould, J.,	A Comparison of Two Methods for Incorporating Fragment Damage in First Principles Airblast and Fragment Loading of Structures	
<u>Lok</u> , Tat-Seng; <u>Pei</u> , Jin- Song	Blast and Impact Resistance of Concrete Panels Reinforced with Externally-Bonded Glass Fibremat	
<u>Lok</u> , Tat-Seng; <u>Xiao</u> , Jia-Run	Effect of Membrane Action on the Response of Steel Fibre Reinforced Concrete Panels Subjected to Air-Blast	
<u>MA</u> , Guowei; HAO, H; ZHOU Y.	Numerical Estimation of Dynamic Response of Underground Chamber Due to Explosion in an Adjacent Chamber	
MacKenzie, Jim	Strengthening Building Components	
<u>Madshus, C.</u> ; Langberg, H.	Ground Shock in Rock - Full Scale Tests in Norway	
Magnusson, Johan	Fibre Reinforced High Strength Concrete Beams Subjected to Transient Load	
Mahmoud, E, H.; Hetherington, J. G.	The Use of Architectural Features to Reduce the Effects of Blast Waves and Fragments on Structures	
Markeset, Gro; Langberg, H.	High Performance Concrete - Penetration Resistance and Material Development	
Martinez, Edward R.	Phenomenology of Penetrator Engagement Concrete	
Matalucci, R.; Mayrhofer, C.	Architectural Surety SM Applications for Building Response to Dynamic Loads	
Mayrhofer, Chr.	Phenomena of Confined Detonations	
<u>Mineev, V.N.</u> ; Mineev, A.V	Design of Protective Structures Essential for Munitions, Radioactive and Toxic Waste Disposal and Hazardous Materials Management	
Morishita, Masahiro	Centrifugal and Numerical Simulations of a Projectile Penetrating Sand	
Morishita, Masahiro,	Damage Evaluation of the Underground Reinforced Concrete Members Subjected to Explosive Loading	
Morrill, K.; Malvar; Crawford	Retrofit Design Procedure for Existing Reinforced Concrete Buildings to Increase their Resistance to Terrorist Bombs	
<u>Oswald, Charles J.</u>	Vulnerability Model for Occupants of Blast Damaged Buildings	
Papados, Ph.; Namburu, R.	Simulation of Single and Multiple Fragments Impacting an RC Slab	
Plenge, Benjamin T.	Discrete Fragment Impact Tests: A Performance Comparison between Real and Surrogate Fragments	
<u>Pope, Dan J</u> , Brian, Young, Hulton	Peak deflection measurement of blast loaded panels using remotely-mounted plastic materials	
<u>Prichard</u> , S.J.; Perry, S.H.	A Comparison between Experimental and Predicted Contact Forces of Confined Concrete under Impact	
Prost, Claude	Protection of Delicate Equipment in Bunkers and Rock Shelters by Use of Nonlinear Wire Rope Elements	
<u>Reinke, Robert E</u> , Leverette, John	Earth Electric Potential Signals as Diagnostic Tools for High Explosive Structures Testing	
<u>Rice, Darren L.</u> ; Neuwald, Peter	A Study of Blast Wall Effectiveness Using Small-Scale Experiments and Hydrocode Calculations	
Riedel, W:	Penetration of Reinforced Concrete by BETA-B-500 Numerical Analysis using a New Macroscopic Concrete Model for Hydrocodes	

Ronkainen, J.; Temet Oy	Destruction Curve Concept Applied in Defining the Maximum Safe Load on Blast Valves	
Rouquand, Alain	Shock Propagation through a Concrete Plate to a Bonded Explosive Charge
