

# International Symposium on Interaction of the Effects of Munitions with Structures

## 1997

<b>Blast</b>		
Bergeron, Zhang (F), Walker, Coffey, CANADA	Numerical and Experimental Study of In-Soil Explosions from a Multiphase Perspective	11
Matthews, Ritzel, AUSTRALIA, Presented by Bergeron, CANADA	A Simple and Tunable Explosion-Source Model for CFD Blast Calculations	35
Neuwald, Reichenbach, GERMANY	Small-Scale Detonations in a Generic Single-Story System - Effect of a Venting Hole on Blast Properties,	47
Tournemine, Canton, FRANCE	Computation of Structure Loading Due to Internal Detonation - Evaluation of Numerical Methods by Comparison with Experimental Data,	57

<b>Constitutive Models in Computational Methods</b>		
Murray, USA	Modeling Rate Effects in Rock and Concrete	65
Ito, Muki, USA	Damage Model for Explosive Interaction	79

<b>General Session Part 1</b>		
Thomsen, Rocco, Sheffield, Rinehart, USA	Calculations of the Blast and Fragmentation Effects of an Aluminized Explosive Charge with a Pre-Scored Case,	101
Woodson, Chiarito, USA	Residual Strength of Fragment-Damaged Slabs,	127
Malvar, Wesevich, Crawford, USA	Procedures for Including Fragment Loading and Damage in the Response Predictions of Reinforced Concrete Slabs	135
Tennant, Levine, Mould, USA	Prediction of Static and Dynamic Response of Reinforced Concrete Slabs Using a Rate-Dependent Three Invariant Softening Model for Concrete	147
Buckland, Slater, CANADA	Analysis of the Structural Response of a Flat Plate Target to the Shock and Bubble Loading from Close-Proximity Underwater Explosions,	165

<b>General Session Part 2</b>		
Rice, Reinberger, USA	The Protective Structures Automated Design System: A New Tool for Designing and Analyzing Hardened Structures,	179
Smith (Mark D.), Biamonte, Sues, USA	Development of a Comprehensive Weaponing Environment Architecture (CWEA),	185
Welch, Joachim, Frankel, USA	In-Tunnel Airblast Engineering Model for Internal and External Detonations,	195

Lunderman, Ohrt, Presented by Welch, USA	Small-Scale Experiments of In-Tunnel Airblast from External and Internal Detonations	209
Plamondon, Seemann, USA	Damage to Aboveground Corrugated Steel Siding Buildings from the Detonation of Mk82 Bombs,	223
Stevens, Hogg, Tarbell, Modares, USA	Mechanical Response and Liquid Release Characteristics of Fragment-Impacted Storage Tanks,	247
Al-Hamad, USA	Breakthrough Technology Shields Against Bomb Blast and Fires,	263

<b>Israeli Tests</b>		
Sofrin, Eytan, ISRAEL (Abstract only - Paper not available for publishing)	Full Scale Explosive Tests on a 5-Storey Structure - General Description and Findings	269
Eytan, Sofrin, ISRAEL (Abstract only - Paper not available for publishing)	Full Scale Explosive Tests on a 5-Storey Structure - Response of Structural Elements,	271
Eytan, Sofrin, ISRAEL (Abstract only - Paper not available for publishing)	Full Scale Explosive Tests on a 5-Storey Structure - Response of Masonry Walls to Blast Loadings,	273
Dinan, USA (Paper not available for publishing)	Blast Loading and Structural Response of Full-Scale Five Storey Building	
Schwarz, ISRAEL	Influence of Protected Spaces on Resistance of Multistorey Buildings Against Blast and Earthquake Loadings	275
Whiting, Coltharp, USA	Retrofit Measures for Conventional Concrete Masonry Unit Buildings Subject to Terrorist Threat,	287
Negri, ISRAEL, MacKenzie, UK, Eytan, ISRAEL	The "Maya Durisol" Protective Wall System - Research, Development, Testing, and Implementation,	307

<b>Penetration and Fragments Panel Session</b>		
Young, USA	Penetration Mechanics - An Experimental Perspective,	321
Johnson, USA	Computational Approaches for Penetration Problems,	337

<b>Penetration Part 1</b>		
Green, Hanchak, Frew, Forrestal, USA	Penetration of Concrete Targets with Ogive-Nose Steel Rods	375
Gran, Frew, USA	Measurement and Computation of Dynamic Stresses During Penetration into Concrete,	391
Amini, USA	Engineering Modeling of Projectile Penetration in Layered Reinforced Media,	403
Clegg, Sheridan, Hayhurst, Francis, UNITED KINGDOM	The Application of SPH Techniques in AUTODYN-2D™ to Kinetic Energy Penetrator Impacts on Multi-Layered Soil and Concrete Targets,.	415
Hiermaier, Thoma, GERMANY	Numerical Simulation of Penetration in Concrete Using Different Types of Code	425
Heiser, Murek, GERMANY	Hydrocode Calculations of the Penetration of Concrete	435

<b>Penetration Part 2</b>		
Pahl, Heckersbruch, Bucking, Langheim, GERMANY	Penetration of Fragments into Reinforced Concrete Targets - An Engineering Approach,	447
Lee, Thomsen, USA	Generalized Coupling Theory Applied to Fragment Impact,	457
Wiren, Nystrom, SWEDEN	Development of Fragment Protection Shields by Use of Computer Models and Verification by Tests with EFG-Explosive Fragment Generator,	479

Lok, Pei, REPUBLIC OF SINGAPORE	Impact Resistance of SFR Concrete Panels as Influenced by Target Thickness and Steel Fiber Reinforcement,	487
Baum, Kuklo, Rosenbury, Simonson, USA	Micropower-Impulse Radar Penetration Diagnostic Measurement,	499
Pearson, Kvavilashvili, Neiderer, Thomas, USA	Penetration Effects on Urban Structures,	511

<b>Protective Design Panel Session</b>		
Smilowitz, DiMaggio, USA	Current Design Practice for the Blast Protection of Commercial Structures,	521
Balsara, USA	Research on Retrofit Hardening for Conventional Buildings,	537

<b>Protective Design Part 1</b>		
Smith (David) UNITED KINGDOM	The Role of the Engineer Before and After Terrorist Bombings - The UK Experience	569
Gott, Watson UNITED KINGDOM	The Peterborough Explosion - An Analytical Case Study	579
Barker, USA	Test Program for Evaluation of Retrofit Filmed Windows Subjected to Blast Loads	589
Krauthammer, Altenberg, USA,	Negative Phase Blast Effects on Glass Panels	599
El-Kadi, Iremonger, Kennedy, UNITED KINGDOM	The Influence of Architectural Designs and Features on the Response of Glazing to Explosive Blast	609
Lofton, Smith (Joseph), Walker, USA	Evaluation of Security Window Films Subjected to Airblast As a Means of Reducing Glass Fragment Hazards	619

<b>Protective Design Part 2</b>		
Quinn, Kennedy, Mays, UNITED KINGDOM	The Response of Steel/Concrete Sandwich Panels to Close-In Explosions,	631
Lindqvist, Forsen, SWEDEN, Presented by Balazs	Combined Effects of Blast and Fragment Loading - Full Scale Experiments with Ordinary Building Walls	641
Mayrhofer, GERMANY	Reinforced Masonry Walls Under Blast Loading,	649
Walls, Rose, Smith (PD), Mays, UNITED KINGDOM	Blast Attenuation Produced by Partially-Failing Protective	659
Crawford, Bogosian, Wesevich, USA	Evaluation of the Effects of Explosive Loads on Masonry Walls and an Assessment of Retrofit Techniques for Increasing Their Strength,	669
Daddazio, Smilowitz, Ettouney, USA	Blast Protection Schemes for Structural Elements,	687
Lok, Pei, Heng, REPUBLIC OF SINGAPORE	Steel Fiber Reinforced Concrete Panels Subjected to Blast Loading	701

<b>Protective Design Part 3</b>		
Bucher, SWITZERLAND	The Underground Ballistic Test Range for Large Calibre Weapons in Switzerland: An Overview Over the Facility and the Highly Dynamic Problems to be Solved	713
Klomfass, GERMANY	Blast-Solid Interaction in Underground Detonations	721
Chong (Karen), Zhou (Yingxin), SINGAPORE	Geometric Configurations for Blast Attenuation	735
Scheklinski-Glück, GERMANY	A Calculation Program for Blastwave Propagation in Branched Tunnel Systems	747

Schwarz, ISRAEL	Membrane Effects Affecting Beams and Plates Subjected to Blast Loads,	755
Hulton, UNITED KINGDOM,	Stand-off Screen Effects - Problems of Energy and Momentum	765

<b>Protective Design Part 4</b>		
Merrifield, MacKenzie, UNITED KINGDOM	Methodology for Estimating the Explosion Yield of Incidents Involving Conventional or Improvised Explosives	773
Sanai, Colton, USA	Assessment of Postulated Terrorist Attacks Using Computer Simulation Techniques and a Fast-Running PC-Based Algorithm,	799
Barker, Whitney, USA	Test Program for Blast and Fragment Mitigation System	819
Tünnissen, USA	A Practical View on Shock Isolation	833
Ting, REPUBLIC OF SINGAPORE	Blast Tests on Protective Targets: General Observations and Conclusions	841
Song, Zhang (Xinle), PEOPLES REPUBLIC OF CHINA	Absorbing Behavior of Elastic Rubber Material and its Design Under Shock Conditions	849

<b>Structures Part 1</b>		
Holm, NORWAY	A Method for Predicting Damage by Ground Shock Loads on Buried Structures,	859
Diangha, UNITED KINGDOM (Paper not available for publishing)	Impact Considerations in Structural Design: Provisions for Bridge and Offshore Structures,	
Carl, GERMANY,	Numerical Simulation of the Effects of Contact Detonations on Concrete Structures,	871
Preece, Attaway, Swegle, Koterak, Matalucci, USA	Coupled Explosive/Structure Computational Techniques at Sandia National Labs	879

<b>Structures Part 2</b>		
Simons, Antoun, Curran, USA	A Finite Element Model for Analyzing the Dynamic Cracking Response of Concrete	889
Rozen, Sofrin, Balteano, ISRAEL	Dynamic Response Analysis of a Protective Door	911
van Doormaal, Weerheijm, Absil, NETHERLANDS	Experimentally Determined Deformation Capacity of Reinforced Concrete Slabs Under Blast Load	919
Ettouney, Srnilowitz, Daddazio, USA	Stochastic Behavior of Structures Subjected to Blast/Fragment Loading	927

<b>Structures Part 3</b>		
Binggeli (Ed), Binggeli (F), SWITZERLAND	Effects of Steel Plates on Airblast Protective Valves,	943
Krauthammer, Oh, USA	Structural Steel Connections Under Blast Loads,	953
Langberg, NORWAY (Paper not available for publishing)	Airblast Damage to Concrete Structures	
Ishikawa, Suzuki, Katsuki, JAPAN	Dynamic Behavior of RC Beams under Rapid Speed Loading,	961
Watson, Hulton, Pope, UNITED KINGDOM	An Experimental Study of Steel Plate Bonding to Concrete Slabs under Close-In Explosions	971

<b>Structures Part 3</b>		
Adeli, Saleh, USA	Active Control of Large Adaptive Structures Subjected to Dynamic Loadings	981
Jiang, Chen, PEOPLES REPUBLIC OF CHINA	Bearing Capacity Analysis of Shallow-Buried Slabs in Soil under Blast Loading,	989
Kraus, Ruppert, GERMANY	Application of Hydrocodes on Structural Concrete - Experience/Possibilities,	999
Wang (Shuangjin), Zhang (Shoubao), Zhou (Fengjun), PEOPLES REPUBLIC OF CHINA	Load on Structures in Soil under Blast Loading,	1009
Zhang (Ya-Dong), Fang, Wang (Lian-Qiao), PEOPLES REPUBLIC OF CHINA	Rate-Dependent Finite Element Analysis of Buried RIC Frames under Blast Loadings,	1023

<b>Test Part 1</b>		
Ando, Yamaguchi, Hoshikawa, Fujimoto, JAPAN	Centrifugal Simulation of Underground Structures in Cohesive Soil Subjected to Blast Loadings,	1035
Bakhtar, USA	Physical Modeling of Material Behavior from a Tunnel Explosion Test at 1-g,	1045
Dutheil, Riviere, Luong, FRANCE	Simulation of Buried Explosions in Macrogravity,	1065
Anderson, Watson, Gott, UNITED KINGDOM	Development of a Large Diameter Split Hopkinson Pressure Bar to Study Compression Wave Transmission Through Soils,	1073

<b>Test Part 2</b>		
Held, GERMANY	Blast Distribution of Cylindrical High Explosive Charges,	1083
Blackburn, Barker, USA	Test Program for Dynamic Response of Blast Resistant Doors,	1099
Krauthammer, USA	Recent Structural Dynamics Research with Precision Impact Tests,	1109
Johnson, UNITED KINGDOM	The Analysis of Blast Effects on Glazing Test Targets	1117
Pan, Diangha, Watson, Hobbs, UNITED KINGDOM	Experimental Study of a Cladding Fixing Assembly Subjected to Impact Loading	1133
Zhou (Fengjun) Shi PEOPLES REPUBLIC OF CHINA	Shockwave and Thermal Radiation Effects from Spherical Explosions,	1141
Chen, Zhou (Fengjun), Su, PEOPLES REPUBLIC OF CHINA	Simulation of Long-Duration and High Overpressure Blast Wave Action Using a Plane Charge	1151
