

# International Symposium on Interaction of Non-Nuclear Munitions with Structures

## 1983

<b>GROUND SHOCK AND LOADS</b>		
J. L. Drake and C. D. Little, Jr., U.S. Army Engineer Waterways Exp. Station	GROUND SHOCK FROM PENETRATING CONVENTIONAL WEAPONS	1
A.L. Florence, D. D. Keough and R. Mak, SRI International	CALCULATIONAL EVALUATION OF THE INCLUSION EFFECTS ON STRESS GAGE MEASUREMENTS IN ROCK AND SOIL	7
P. S. Westine and G. J. Friesenhahn, Southwest Research Institute	FREE-FIELD GROUND SHOCK PRESSURES FROM BURIED DETONATIONS IN SATURATED AND UNSATURATED SOILS	12

<b>IMPACT AND PENETRATION OF CONCRETE AND ROCK</b>		
W. F. Anderson, A. J. Watson and P. J. Armstrong, University of Sheffield, United Kingdom	HIGH VELOCITY PENETRATION INTO FIBRE-REINFORCED CONCRETE MATERIALS - PROTECTION OF BUILDINGS	17
M. J. Forrestal, D. B. Longcope and L. M. Lee, Sandia National Laboratories	ANALYTICAL AND EXPERIMENTAL STUDIES ON PENETRATION INTO GEOLOGICAL TARGETS	23
M. Hulsewig, E. Schneider and A. J. Stilp, Ernst-Mach- Institut, F.R. Germany	PENETRATION BEHAVIOR OF HIGHLY DEFORMABLE PROJECTILES IN CONCRETE SLABS	27

<b>IMPACT AND PENETRATION OF EXPLOSIVES AND SHAPED CHARGES</b>		
C. E. Joachim, USAE Waterways Experiment Station	RAPID RUNWAY CUTTING WITH SHAPED CHARGES	32
H. Krier, M. Dahm and P. B. Butler, University of Illinois	MODELING THE BURN-TO-VIOLENT REACTION TO SIMULATE IMPACT-DAMAGED GP WARHEADS	37
H. Napadensky, A. Longinow, E. Hahn and E. Swider, IIT Research Institute	PREDICTING RESPONSE OF MUNITIONS TO MASSIVE SECONDARY FRAGMENT IMPACT: A PROPOSED ANALYTICAL METHOD	44

<b>MATERIAL MODELS</b>		
Z. P. Bazant and B. H. Oh, Northwestern University	MICROPLANE MODEL FOR FRACTURE ANALYSIS OF CONCRETE STRUCTURES	49
W. F. Chen and T. Y. Chang, Purdue University	A PLASTIC FRACTURE MODEL FOR CONCRETE MATERIALS	56
M. M. Hightower, Sandia National Laboratories	THE EFFECTS OF CURING AND AGING ON THE TRIAXIAL PROPERTIES OF CONCRETE IN UNDERGROUND STRUCTURES	65
C. L. D. Huang and H. S. Walker, Kansas State University	STRENGTH CRITERIA FOR ANISOTROPIC MATERIALS	69

H.-Y. Ko, R. W. Meier, D. E. Egging, S. Sture and C. C. Feng, University of Colorado	CONSTITUTIVE PROPERTIES OF STEEL FIBER REINFORCED CONCRETE IN MULTIAXIAL LOADING	71
H. L. Schreyer and J. E. Bean, University of New Mexico	A SIMPLIFIED VISCOPLASTIC THEORY FOR FRICTIONAL MATERIALS	77
S. P. Shah, Northwestern University Technological Institute	CONSTITUTIVE RELATIONS OF CONCRETE SUBJECTED TO A VARYING STRAIN RATE	81

#### **MATERIAL RESPONSE**

W. F. Anderson, A. J. Watson, M. R. Johnson and G. J. McNeil, University of Sheffield, United Kingdom	ROCK/ELASTOMER COMPOSITES AS IMPACT RESISTANCE MATERIALS	85
M. Hulsewig, E. Schneider and A. J. Stimp, Ernst-Mach- Institut, F.R. Germany	BEHAVIOR OF FIBER REINFORCED CONCRETE SLABS UNDER IMPACT LOADING	91
S. Sture, University of Colorado	EXPERIMENTAL MODELING OF STRENGTH AND DEFORMATION BEHAVIOR OF CONCRETE IN DIRECT SHEAR	95
J. Christensen and K. J. Willam, University of Colorado	FINITE ELEMENT ANALYSIS OF CONCRETE FAILURE IN SHEAR	101

#### **SOIL LIQUEFACTION**

S. F. Mason and W. E. Wolfe, Ohio State University	SHAKING TABLE TESTS TO EVALUATE THE LIQUEFACTION POTENTIAL OF NEAR SURFACE SATURATED SAND DEPOSITS	107
---	--	-----

#### **SOIL MODELS**

K. Arulanandan, A. Anandarajah and N. J. Meegoda, University of California	SOIL CHARACTERIZATION FOR NON- DESTRUCTIVE IN SITU TESTING	112
---	--	-----

#### **STRUCTURAL ANALYSIS**

H. E. Auld and W. C. Dass, Applied Research Assoc., Inc.	ANALYSIS OF BURIED REINFORCED CONCRETE ARCH STRUCTURES UNDER DYNAMIC LOADS	119
W. E. Baker, Southwest Research Institute	THE USE OF COMPENDIA, DESIGN MANUALS, AND REFERENCE TEXTS IN PREDICTION OF NONNUCLEAR WEAPONS EFFECTS	124
C. W. Bert, University of Oklahoma	ANALYSIS OF CONTAINMENT RINGS FOR FLYWHEEL BURST PROTECTION	130
S. F. Borg, Stevens Institute of Technology	A RATIONAL APPROACH TO THE ANALYSIS OF STRUCTURES SUBJECTED TO UNDERGROUND BLASTS	135
Y. Crutzen, Control Data Italia, Italy	EXTREME DYNAMIC LOADING EFFECTS ON STEEL AND CONCRETE SHELL STRUCTURES	141
M. Akgun, F. D. Ju and T. L. Paez, University of New Mexico	FRACTURE DIAGNOSIS IN STRUCTURES USING CIRCUIT-ANALOGY	146
W. Karthaus and J. W. Leussink, Prins Maurits Laboratory TNO, Netherlands	DYNAMIC LOADING: MORE THAN JUST A DYNAMIC LOAD FACTOR	151
B. L. Morris and P. H. Zabel, Southwest Research Institute	THE EFFECTS OF INDIRECT-FIRE MUNITIONS ON FRAMED STRUCTURES	155
M.-G.-L. Wang, T. L. Paez and F. D. Ju, University of New Mexico	MODELS FOR DAMAGE DIAGNOSIS IN SDF STRUCTURES	159

<b>STRUCTURAL DESIGN</b>		
W. A. Keenan and J. E. Tancreto, Naval Civil Engineering Laboratory	TODAY'S CONSTRAINTS DRIVE AMMO MAGAZINES UNDERGROUND	165
B. E. Vretblad and G. B. Svedbjork, Royal Swedish Fortifications Administration, Sweden	SWEDISH DESIGN MANUAL FOR PROTECTIVE STRUCTURES	172
F. S. Wong and P. Weidlinger, Weidlinger Associates	DESIGN OF UNDERGROUND SHELTERS INCLUDING SOIL-STRUCTURE INTERACTION EFFECTS	174

<b>STRUCTURAL RESPONSE</b>		
W. E. Baker, J. C. Hokanson, E. D. Esparza and N. R. Sandoval, Southwest Research Institute	GAS PRESSURE LOADS FROM EXPLOSIONS WITHIN VENTED AND UNVENTED STRUCTURES	177
C. van der Veen and J. Blaauwendraad, Rijkswaterstaat Bouwresearch, The Netherlands	STRUCTURAL RESPONSE OF RC-MEMBERS IN CASE OF IMPULSIVE LOADING: FAILURE ANALYSIS IN BENDING AND SHEAR	182
W. Char and M. M. Dernbo, US. Army Engineering Div. Huntsville	COMPARISON OF PREDICTIVE METHODS FOR STRUCTURAL RESPONSE TO HE BLAST LOADS	188
F. D. Hains, Naval Surface Weapons Center	RESPONSE OF A LINEAR STRUCTURE TO AN EXPONENTIAL PRESSURE PULSE	193
C. H. Henager, Battelle Northwest	THE USE OF STEEL FIBER REINFORCED CONCRETE IN CONTAINMENT AND EXPLOSIVE-RESISTANT STRUCTURES	199
G. Hoffmann and K. Behrens, Fraunhofer-Institut für Kurzzeitdynamik, F.R. Germany	SIMULATION OF PRESSURE WAVES AND THEIR EFFECTS ON LOADED OBJECTS, PART 1: OUTLINING THE PROBLEM, DESCRIPTION OF THE SIMULATION DEVICE	204
K. Behrens and G. Hoffman, Fraunhofer-Institut für Kurzzeitdynamik, F.R. Germany	SIMULATION OF PRESSURE WAVES AND THEIR EFFECTS ON LOADED OBJECTS, PART II: EXPERIMENTS AND CALCULATIONS, DESTRUCTION CURVES	210
B. E. Vretblad, Royal Swedish Fortifications Administration, Sweden	RESPONSE OF STRUCTURES TO DETONATIONS IN SAND	216

<b>STRUCTURAL TESTS</b>		
H. Hader, Ernst Basler & Partners, Switzerland	EFFECTS OF BARE AND CASED EXPLOSIVES CHARGES ON REINFORCED CONCRETE WALLS	221
M. Kropatscheck, Federal Armed Forces Institute for Operational Analysis and Exercises, F.R. Germany	TESTS AND EVALUATIONS OF CLOSE-IN DETONATIONS	227
