Symposium on Interaction of the Effects of Munitions with Structures

2013

Abraham, Joseph Magallanes, Joseph M.;	Coupled Calculations for Explosive Effects on Structures	
Alberson, Ryan Davis, Carrie; Marchand, Kirk; Conrath, Ed; Misko, Samuel	Deformed Shape Analysis of Coupled Glazing Systems	
Ambrosini, Daniel Codina, Ramón; Borbón, Fernanda de	Channeling effects due to explosions in urban environments	
Anderson, J. Randy Hodgson, Sherri D.; Scarborough, Eric L.	Iterative Model Development for Complex Blast Environments	NATO
Arnold, W. Rottenkolber, E.	A Fast Running Model for Post-Detonation Effects in Buildings: Air Shock, Gas Flow and Particle Transport	NATO
Astarlioglu, Serdar Krauthammer, Ted; Bui, Long	Response of Reinforced Concrete and Ultra-High-Performance Concrete Columns to Blast	
Bach, Andreas Nöldgen, M.; Stolz, A.	A Contribution to a Reliable Design of Reinforced-Concrete Elements against Explosions	
Julien, Baptiste Sochet, Isabelle; Thierry, Vaillant	Impact of the Volume of the Rooms on the Shock Wave Propagation within a Multi-Chamber System	
Barnes, I.M. Taywell, M.G.; Leeming, D.W.	A Study into the Physical Properties and Internal Material State of Soft-Recovered Munition Fragments	
Rumer, Roger Benz, V.; Lorenzo, J.; Pyles, R.; Wiecking, K.	A new blast-mitigation solution for building facades protection with a laminated polycarbonate based system	
Beppu, Masuhiro Ogawa, Atsuhisa; Takahashi, Jun	Dynamic Tensile Properties of Fiber Reinforced Cementitious Composites	
Bewick, Bryan O'Laughlin, Casey; Williamson, Eric	Development of ImpulseDamage Curves for Conventional Steel Stud Infill Walls	
Bogosian, David Lowak, Michael J.; Chastain, Flavel	Vulnerability of Water Pipes to Explosively Driven Wall Debris	NATO
Bongartz, A. Wösten, B.; Rohen, K.	Assessment of Component Damage due to Blast in a Complex Hardened Infrastructure in Comparison with Pressure Measurements	NATO
Bongartz, A. Farrand, T.; Summers, R.; Bohmann, F.; Luttermann, D.	Effects of Medium Caliber Ammunition against MOUT Targets	NATO
Borgers, Jody Vantomme, John; van der Stoel, Almer	Validation of New Blast Scaling Rules for Structural Testing	
Brombacher, B. Radtke, F.; Steyerer, M.	Hazard and damage analysis of a VBIED attack on a hotel using ESQRA-GE 3.0	
Cavelti, Balz	CHE Passive Modular Protection System for Peace Support Missions	

Cavelti, Balz	Comparison of Normal Concrete slabs with UHPFRC and Mixed (UHPFRC – NC – UHPFRC) slabs against contact and near field detonations – consequences for retrofitting measures	
Chen, Li Fang, Qin; Hao, Hong	Calibration and Discussion of Parameters of Mat_72rel3 Constitutive Model On Clay Brick And Mortar Materials	
HAO, Hong Chen, Wensu; Chow, Pei Shan; Fan, Keqing	Laboratory Tests of Multi-arch Double-layered Panels under Uniform Impact Loadings	
Chen, X.W. Zhao, J.	Bending of Normal Penetrating Projectile Induced by Asymmetrical Mass Abrasion	
Chiarito, V. Papados, P.; Minor, J.; Haskins, K.; Kiger, S.; Coleman, T.	Numerical Simulation and Experimental Evaluation of Mitigations to Defeat Close-In Detonations Against Scaled Reinforced Concrete Box Structures	
Chikhradze, Mikheil Bochorishvili, Nika; Akhvlediani, Irakli; Marjanishvili, Shalva	Wireless System for the Detection of Accidental Explosions in Underground Structures	
Chung Kim Yuen, S. Nurick, G.N.; Kuttel, J.L.; Pickering, E.G.	The Effect of Moisture on the Response of Quadrangular Plates Subjected to Buried Charge Loads	
Clough, Laurence G. Clubley, Simon K.	Gauging the Fireball: Simulation and Testing	
Collins, Robert V. Clubley, Simon K.	Structural Dynamics of Glazing Panel Breakage for Long Duration Blast Loads	
Wilkinson, W.P. Cormie, D.; Shin, J.; Whittaker, A.S.	Modeling close-in detonations in the near-field	
Cormie, D. Whittaker, A.S.; Wilkinson, W.P.; Shin, J.	Scaled-distance relationships for close-in detonations	
Coughlin, Andrew McQuillan, Alexandro	Multiple Weapons Effects and Failure Modes Using "Synthetic" Pressure-Impulse Dia-grams in Blast Vulnerability Assessments	
Cusatis, Gianluca Smith, Jovanca; Pelessone, Daniele; O'Daniel, James	Discrete Modeling of Projectile Penetration of Ultra High Performance Concrete	
Davidson, James S. Nickerson, Joseph M.; Trasborg, Patrick A.; Newberry, Charles M.; Naito, Clay J.	Use of Foam-Insulated Concrete Sandwich Panels for Blast Protection Applications	
Dey, Sumita Børvik, Tore; Rakvåg, Knut Gaarder	On the Credibility of Computer-Aided Design for Protective Structures	
Ding, Yang Chen, Ye	Simplified blast load model on members and walls under internal explosions	
Ding, Yang Song, Xiaoran	A New Method For Progressive Collapse Analysis of Steel Frame Structure Under Blast Loads	

Dirlewanger, H.	Handbook on the Physical Protection of Military Accomodations in Operations	
Dörr, A. Gebbeken, N.; Larcher, M.; Steyerer, M.; Haberacker, Chr.	The Effect of Near-Field Explosions on Masonry Walls	
Dorsch, Heinrich Staubs, Ernest; Verhagen, Theo	Modeling of Weapon Effects in Urban Operations	NATO
WU, Chengqing Dragos, Jonathon	Global Instability of Blast Loaded Steel Columns	
Edri, I. Yankelevsky, D.Z.; Feldgun, V.R.; Karinski, Y.S.	Prediction of Gas Pressure in an Internal Blast Scenario	
Stevens, David Edrisi, Baktosh H.; Sagebiel, Erick J.; Mathew; Magrini, Michael	Protective Roof Materials for Small Shaped Charge Munitions	
Esteban, Beatriz Gebbeken, N.; Larcher, M.	Numerical simulation of a shaped charge impacting a concrete target	
Eytan, Reuben Eytan, Micaela	Blast-Resistant Elevation Walls – New Buildings	
Eytan, Reuben Eytan, Micaela	Blast-Resistant Elevation Walls – Existing Buildings	
Feldgun, V.R. Karinski, Y.S.; Yankelevsky, D.Z.	The Effect of an Internal Explosion in a Tunnel on a Neighboring Buried Structure and Free Surface	
Friedrich, Nico Krauthammer, Ted; Stone, Michael, Koch, Daniel; Bui, Long; Astarlioglu, Serdar	Impact Testing of Normal Strength and Ultra-High Performance Concrete Cylinders	
Giovino, Giannicola Olmati, Pierluigi; Bontempi, Franco	Vulnerability assessment of precast concrete cladding wall panels for police stations: experimental and numerical investigations	
Glanville, J.P. Barnes, I.M.	Numerical Simulation of the Natural Fragmentation of Cased Munitions	
Gran, James K.	Blast in a Pipe with Large Ratios of Explosive Mass to Pipe Volume	
Greulich, Stefan Cargile, Donald	Developing Penetration Algorithms for MOUT Target Materials.	NATO
Haberacker, Chr. Höllinger, R.; Turek, W.; Dörr, A.	Secondary Debris Hazard Due to Near-, Contact- and Embedded-Detonations	
Hao, H. Hao, Y.	SHPB tests of dynamic material properties of spiral-shaped steel fibre reinforced concrete under splitting tension	
Hao, H. Hao, Y.	Influence of the concrete strain rate effect on the numerical predictions of RC wall re-sponses to blast loadings	

Hartmann, Thomas Greulich, Stefan; Richter, Rene	Fast Analysis of Safety Areas for Eod in Urban Environment	
Hauser, Stephan	High-performance micro-reinforced concrete as protective measure for mitigation of weapon and blast effects (DUCON)	
Hodgson, Sherri D. Anderson, J. Randy; Hogg, David M.	Effects of Fragments on Structural and Mechanical Components.	NATO
Hong, Jian Fang, Qin; Kong, Xiangzhen	The Inertia Effect of Concrete-Like Material in Shpb Test	
Hulton, Frederick Pickup, M.B.	The development of gabion based barriers to resist ramming attack	
Hulton, Frederick Eytan, Alex; Walker, Martin; Widdowfield, Simon	The Response of a Tower to Blast Loading: Analysis, Design, Testing	
Keys, Richard A. Clubley, Simon K.	Modelling debris distribution of masonry panels subject to blast loads using experimental & applied element methods	
Khoe, Yoeng Sin Weerheijm, J.; Tyler Street, M.D.	Towards reliable simulations of ballistic impact on concrete structures	
Kisters, Thomas Kuder, Jürgen; Töpel, Andre; Schwarz, Werner	Air Blast Flow Measurements After Indoor Detonations	NATO
Asprone, D. Prota, A.; Parretti, R.; Nanni, A.; Kivity; Y.	Blast Mitigation Using Semi-Open Barriers	
Klomfass, A. Zweigle, T.	A New AMR/ALE-Solver for the efficient Simulation of Detonations and Blast Waves	
Kong, Xiangzhen Fang, Qin; Hong, Jian; Wu, Hao	Numerical study of the wake separation and reattachment effect on the trajectory of a hard projectile	
Kopowski, Stefan Gebbeken, Norbert	Wood as an Element for Protective Structures Subjected to Small Caliber Impact	
Kummer, Peter O.	Building Damage due to Explosions in Urban Environment - Part 1: Development of a blast damage assessment tool	
Landmann, Frank	Development of Safety Measures on Military Airfields in the Form of Barrier Walls by Means of Numerical Simulation	
Langdon, G.S. Ozinsky, A.; Chung Kim Yuen, S.	Response of partially confined cylinders to internal air-blast loading: preliminary experiments and simulations	
Larcher, Martin Gebbeken, Norbert; Bieber, Philipp; Wandelt, Jens; Tran, Ngoc Tho; Peroni, Marco; Solomos, George	Dynamic Increase Factor of Masonry Materials: Experimental Investigations	
Latunde-Dada, Seyi	Quantifying Non-Ideal Air blast Overpressures	

Sohn, Holger	Published in hardcopy only to NATo-citizens.	
Lavenhagen, David Krauthammer, Ted; Astarlioglu, Serdar; Bui, Long	Modeling Direct Shear in Concrete	
Leeming, D.W. Taywell, M.G.; Barnes, I.M.	The Development and Application of a High-Velocity Gun to Study the In-Flight Properties of Recovered Munition Fragments and their Interaction with Target Materials	
Li, Bing Qian, Kai	New Deformation–Controlled Design of Reinforced Concrete Flexural Members Subjected to Blast Loadings	
Li, Jun Hao, Hong	Simplified Numerical Simulation of Frame Structure Under Blast Loads	
Li, Zhongxian Liu, Zefeng	A Concrete Constitutive Model Considering High Strain Rate And High Temperature	
Lips, Hendrik Greulich, Stefan	Investigations of Penetrator Designs to Maximize Breaching Effects
