

International Symposium on Interaction of Non-Nuclear Munitions with Structures

1993

Werner Heierli and Arthur Eiff, Heierli Consulting Engineers, SWITZERLAND	DEFENCE IN THE AGE OF PRECISION GUIDED MUNITIONS	1
Ali Amini, UTD, Incorporated; and Jon Anderson, Wright Laboratory Airbase Systems Branch	MODELING OF PROJECTILE PENETRATION INTO GEOLOGIC TARGETS BASED ON ENERGYTRACKING AND MOMENTUM IMPULSE PRINCIPLE	6
Joseph M. Gebara and Austin D. Pan, Purdue University; and Jon B. Anderson, Wright Laboratory Airbase Systems Branch	ANALYSIS OF ROCK-RUBBLE OVERLAY PROTECTION OF STRUCTURES BY THE FINITE BLOCK METHOD	12
Mark D. Adley, US Army Engineer Waterways Experiment Station	A SIMPLY COUPLED PENETRATION TRAJECTORY /STRUCTRUAL DYNAMICS MODEL	18
Jeffrey Peters, William F. Anderson and Alan J. Watson, University of Sheffield, UNITED KINGDOM	DEVELOPMENT OF INSTRUMENTATION TECHNIQUES TO INVESTIGATE HIGH VELOCITY PROJECTILE PENETRATION INTO CONSTRUCTION MATERIALS	23
M. J. Forrestal and B. S. Altman, Sandia National Laboratories; J. D. Cargile, US Army Engineer Waterways Experiment Station; and S. J. Hanchak, University of Dayton Research Institute	AN EMPIRICAL EQUATION FOR PENETRATION DEPTH OF OGIVE-NOSE PROJECTILES INTO CONCRETE TARGETS	29
Helga Langheim, Eberhard Schmolinske and Alois J. Stilp, Ernst-Mach-Institut, GERMANY; and Hermann Pahl, NATO Headquarters, BELGIUM	SUBSCALE PENETRATION TESTS WITH BOMBS AND ADVANCED PENETRATORS AGAINST HARDENED STRUCTURES	33

T. Fries and D. Favarger, Defence Technology and Procurement Agency, SWITZERLAND; and M. Koller, R6sonance SA, SWITZERLAND	IMPACT OF PROJECTILES ON HARD LAYERS 39	39
Vladimir M. Gold, James C. Pearson and Joseph P. Turci, US Army ARDEC	RESISTANCE OF CONCRETE AND REINFORCED CONCRETE STRUCTURES IMPACTED BY CU AND TA PROJECTILES	44
James M. Underwood, Applied Research Associates, Inc.; and Michael K. Westmoreland, Wright Laboratory Airbase Systems Branch	PENETRATION COUNTERMEASURES	50
T. A. Rose, P. D. Smith and G. C. Mays, Royal Military College of Science, UNITED KINGDOM	LEAKAGE PRESSURES BEHIND BLAST WALLS	56

James A. Keller, University of Denver	ENVIRONMENTS FROM INTERNAL DETONATION OF WARHEADS	62
G. Scheklinski-Glück, Ernst-MachInstitut, GERMANY	BLAST IN TUNNELS AND ROOMS FROM CYLINDRICAL HE-CHARGES OUTSIDE THE TUNNEL ENTRANCE	68
J. Hasler, LUWA Ltd., SWITZERLAND	BLAST VALVES - A SUPERFLUOUS INVESTMENT?	74
Ph. van Oongen and J. Weerheijm, TNO Prins Maurits Laboratory, THE NETHERLANDS	PREDICTION OF IN-STRUCTURE SHOCK	80
Erwin Kessler and Bernard Anet, Laboratory Spiez, SWITZERLAND	STOCHASTIC SIMULATION OF IN STRUCTURE SHOCK DUE TO CONVENTIONAL WEAPON EFFECTS	84
Leslie J. Kennedy, Royal Military College of Science, UNITED KINGDOM; Frederick G. Hulton, Defence Research Agency, UNITED KINGDOM; and Michael C.R. Davies, University of Wales, UNITED KINGDOM	SUB SURFACE BARRIERS FOR GROUND SHOCK ATTENUATION: NUMERICAL TECHNIQUES TO MODEL EXPERIMENTAL RESULTS,	89

Larry C. Muszynski and Michael A. Rochefort, Applied-- Research Associates, Inc.	MATERIALS FOR EXTERNAL SHOCK MITIGATION	95
Ronald Kaufmann, Armed Forces Office, GERMANY; and Fritz Rischbieter, Battelle Motor and Vehicle Technology, GERMANY	SHOCK TEST FACILITIES FOR HIGH SHOCK TESTS	100
Reuben Eytan, Eytan Building Design Ltd., ISRAEL; and Arkadi Kolodkin, Hardening Consultant, ISRAEL	PRACTICAL STRENGTHENING MEASURES FOR EXISTING STRUCTURES TO INCREASE THEIR BLAST RESISTANCE - WALLS AND CEILINGS	105
Arkadi Kolodkin, Hardening Consultant, ISRAEL; and Reuben Eytan, Eytan Building Design Ltd., ISRAEL	PRACTICAL STRENGTHENING MEASURES FOR EXISTING STRUCTURES TO INCREASE THEIR BLAST RESISTANCE - WINDOWS AND DOORS	109
Yitzhak Fouks, Israeli Defense Forces, ISRAEL	FULL SCALE TESTS ON STRENGTHENING MEASURES FOR EXISTING STRUCTURES	113
M. Rosenblatt, D.W. Hatfield and H. D. Zimmerman, Titan Corporation	CONVENTIONAL EXPLOSIVE AIRBLAST EFFECTS WITHIN COMPARTMENTED STRUCTURES	116
Mark G. Whitney, Darrell D. Barker and Johnny H. Waclawczyk, Jr., Wilfred Baker Engineering, Inc.	STRUCTURAL RESPONSE TO MULTIPLE PULSE BLAST LOADING	122
Tommy Wiren, Swedish Rescue Services Board, SWEDEN	TEST OF CIVIL DEFENCE CONTROL CENTRE, RC 90	128
R. Watt, 62 CRE Royal Engineers, UNITED KINGDOM; and M. G; Richardson, 523 Specialist Team Royal Engineers, UNITED KINGDOM	COUNTER TERRORIST FORTIFICATIONS IN NORTHERN IRELAND	134
Barry L. Bingham, Robert E. Walker and Scott E. Blouin, Applied Research Associates, Inc.	RESPONSE OF PILE FOUNDATIONS IN SATURATED SOIL	140

R. E. Walker and S. E. Blouin, Applied Research Associates, Inc.	RESPONSE OF SATURATED AND PARTIALLY SATURATED SOILS TO HIGH EXPLOSIVE LOADINGS - NUMERICAL ANALYSIS	146
David L. Read and Larry C. Muszynski, Applied Research Associates, Inc.	FIBER-REINFORCED CONCRETE IN HARDENED SHELL CONSTRUCTION	152
G. Naeyaert, Infrastructure Dep., MOD BELGIUM; A. H. Verhagen, Royal Military Academy, THE NETHERLANDS; and T. Turker, UNITEK Consult, Eng., TURKEY	A COMBINATION OF STEEL FIBERS AND CONVENTIONAL REINFORCEMENT IN PROTECTIVE CONCRETE STRUCTURES SUBJECTED TO NEAR MISS EXPLOSIONS, CONTACT EXPLOSIONS, DIRECT HITS, AND EXPLOSIONS AFTER PENETRATION	158
David L. Read and Douglas H. Merkle, Applied Research Associates, Inc.	EXPEDIENT REPAIR OF MISSION-CRITICAL STRUCTURAL FACILITIES	166
D. E. Grady, Sandia National Laboratories	IMPACT COMPRESSION PROPERTIES OF CONCRETE	172
D. Chandra and T. Krauthammer, Pennsylvania State University	HIGH LOADING RATE EFFECTS ON STRUCTURAL CONCRETE RESPONSE UNDER IMPULSIVE LOADS	176
A. D. Pullen and J. B. Newman, Imperial College, UNITED KINGDOM; and A. J. Sheridan, Defence Research Agency, UNITED KINGDOM	DYNAMIC COMPRESSIVE BEHAVIOUR OF CONCRETE AT STRAIN RATES UP TO 103 /S . COMPARISON OF PHYSICAL EXPERIMENTS WITH HYOROCODE SIMULATIONS	182
J. Peters, W.F. Anderson and A. J. Watson, University of Sheffield, UNITED KINGDOM	USE OF LARGE DIAMETER HOPKINSON BAR TO INVESTIGATE THE STRESS PULSE GENERATED DURING HIGH VELOCITY PROJECTILE PENETRATION INTO CONSTRUCTION MATERIALS	188
J. W. Tedesco, Auburn University; C. Allen Ross, University of Florida; and M. L. Hughes, Wright Laboratory Airbase Systems Branch	LOAD RATE EFFECTS ON CONCRETE COMPRESSIVE STRENGTH	194

J. Weerheijm and J. C. A.M. van Doormaal, TNO Prins Maurits Laboratory, THE NETHERLANDS; and L. J. Sluys, Delft University of Technology, THE NETHERLANDS	FRACTURE ENERGY OF CONCRETE UNDER DYNAMIC TENSILE LOADING	200
Charles J. Oswald, Kirk A. Marchand and Ben H. Thacker, Southwest Research Institute	A NUMERICAL SIMULATION OF STRESS WAVE PROPAGATION IN CONCRETE AND ITS EFFECT ON SPALL AND BREACH IN SCALED TESTS	205
Robert W. Cilka and Frank A. Maestas, Applied Research Associates, Inc.; and Marvis Adams, Aeronautical Systems Directorate	CUMULATIVE DAMAGE ALGORITHMS DEVELOPMENT FOR REINFORCED CONCRETE	211

John A. Collins, Wright laboratory; Frank A. Maestas and Barry L. Bingham, Applied Research Associates, Inc.; and James A. Keller and W. Russ Seabaugh, University of Denver	EXPERIMENTAL/ANALYTICAL PROGRAM FOR CONSTRUCTING MODELS FOR THE DYNAMIC RESPONSE OF CONCRETE MATERIALS	215
J. E. Welter, Defense Nuclear Agency	JOINT SERVICES PROGRAM FOR THE DESIGN AND ANALYSIS OF HARDENED STRUCTURES TO CONVENTIONAL WEAPONS EFFECTS	220
M. C. R. Davies and A. J. Williams, · University of Wales College of Cardiff, UNITED KINGDOM; and K. J. Claber, ORA, UNITED KINGDOM	CENTRIFUGE MODELLING TESTING TO INVESTIGATE THE USE OF BARRIERS TO MITIGATE BLAST EFFECTS ON BURIED STRUCTURES	224
Maynard A. Plamondon, Daniel E. Chitty, Robert L. Guice and Douglas H. Merkle, Applied Research Associates, Inc.	FROUDE-SCALED TESTS OF EXPLOSIVELY LOADED BURIED STRUCTURES USING A SOIL SIMULANT	229
Magnus Langseth, Torodd Berstad and Per Kr. Larsen, The Norwegian Institute of Technology, NORWAY; and Arnfinn Janssen, Norwegian Defence Construction Service, NORWAY	IMPACT LOADING OF PLATES· A COMPARISON BETWEEN NUMERICAL SIMULATIONS AND EXPERIMENTAL RESULTS	235

Larry M. Bryant, Paul F. Mlakar and Brian Campbell, JA YCOR; and Richard Reid, Wright Laboratory Airbase Systems Branch	DESIGN PROCEDURE FOR PREFABRICATED ROOF BEAMS FOR BLAST-RESISTANT SHELTERS	241
Christopher Y. Tuan, Applied Research Associates, Inc.	PROTECTIVE CONSTRUCTION WITH REINFORCED EARTH	247
Richard A. Reid, Wright Laboratory Airbase Systems Branch; and Robert C. Bachus, Kara L. Olen and Richard Fragaszy, GeoSyntec Consultants	RESPONSE OF GEOGRID-REINFORCED SOIL SUBJECTED TO BLAST LOADING	
D. Kraus and J. Rotzer, University of German Armed Forces, GERMANY	DIMENSIONING OF HIGH EXPLOSIVE DETONATIONS ON CONCRETE STRUCTURES	259
Lena Lönnqvist, National Defence Research Establishment, SWEDEN	THE EFFECTS OF HIGH EXPLOSIVES IN CONTACT WITH REINFORCED CONCRETE SLABS	262
Pierre Y. Chanteret, French-German Research Institute of Saint-Louis, FRANCE	ON MODELLING OF SHAPED CHARGE JET INTERACTION WITH SPACED PLATES	267
Hermann Rosner, Deutsche Aerospace AG, GERMANY	OPTIMIZATION OF SHAPED CHARGES AGAINST CONCRETE TARGETS	273
Fang Qin, Nanjing Engineering Institute, PEOPLE'S REPUBLIC OF CHINA	RESPONSIVE CHARACTERISTICS OF BURIED STRUCTURES SUBJECTED TO IMPULSIVE LOADINGS	277
QiHu Qian and Mingyang Wang, Nanjing Engineering Institute, PEOPLE'S REPUBLIC OF CHINA	FEM IN SATURATED SOIL UNDER EXPLOSIVE LOADING	282

B. R. Phillips, D. E. Barnes and A. E. Jackson, Jr., US Army Engineer Waterways Experiment Station; and T. R. Slawson and R. E. Walker, Applied Research Associates, Inc.	MATERIAL PROPERTIES DATABASE SEARCH AND RETRIEVAL PROGRAM	289
H. D. Zimmerman, Y. M. Ito and J. A. Carney, Titan Corporation	EFFECTIVE STRESS CONSTITUTIVE MODELS FOR SATURATED & PARTIALLY SATURATED SOILS	294
George E. Veyera, University of Rhode Island; Wayne A. Charlie, Colorado State University; and C. Allen Ross, University of Florida	STRAIN-RATE EFFECTS IN UNSATURATED SOILS	300
H. D. Zimmerman, Y. M. Ito and J. A. Carney, Titan Corporation; and J. E. Windham, US Army Engineer Waterways Experiment Station	EFFECTS OF ENHANCED CONSTITUTIVE MODELS ON CALCULATED FREE-FIELD GROUND SHOCK	305

Robert H. Sues and Lawrence A. Twisdale, Applied Research Associates, Inc.	HOW TO SELECT A DESIGN FRAGMENT FOR PROTECTIVE STRUCTURE DESIGN WITH CONSISTENT RELIABILITY	311
R. H. Sues, J. L. Drake and L. A. Twisdale, Applied Research Associates, Inc.	RELIABILITY-BASED SAFETY FACTORS FOR GROUND SHOCK LOADS IN PROTECTIVE CONSTRUCTION	317
L. A. Twisdale, R.H. Sues and F. M. Lavelle, Applied Research Associates, Inc.	RELIABILITY-BASED DESIGN METHODS FOR THE PROTECTIVE CONSTRUCTION DESIGN MANUAL	323
R. L. Sierakowski, Ohio State University; and C. A. Ross, University of Florida	DYNAMIC PROPERTIES OF NOVEL THERMOPLASTIC HONEYCOMB CORE MATERIAL	329
Robert J. Majka, Applied Research Associates, Inc.	COMPOSITE MATERIALS -THE FUTURE OF AIRMOBILE SHELTERS	332
Francis M. Lavelle and Lawrence A. Twisdale, Applied Research Associates, Inc.	AIRMOBILE SHELTER CONCEPT SELECTION METHODOLOGY	335
Lawrence A. Twisdale, Francis M. Lavelle and Robert A. Frank, Applied Research Associates, Inc.	RESEARCH TO DEVELOP CONCEPTS FOR A NEW FAMILY OF AIRMOBILE SHELTERS	341
